What is Science and What Do Scientists Do that's Different?: Why Trust Them?

1. What do you believe about science?
2. What led you to your current beliefs about science? such as, people, experience, books, institutions, religion, reason, evidence, etc.
3. What do you think of when you hear someone talk about the “scientific process” or “scientific method”?
4. What are some aspects of science you trust?
5. What are some aspects of science you don't trust?
6. What questions do you have for scientists? — researchers, teachers, doctors, or others in science
